

A PROCESS FOR THE TREATMENT OF POLLUTED METAL-MECHANIC  
INDUSTRIAL WASTEWATER AND URBAN WATER.

ABSTRACT

Process for the treatment of polluted metal-mechanic industrial waste  
5 water and urban water, comprising: treating the polluted water with an acid liquor  
including ferrous chloride and hydrochloric acid, in order to promote the  
denaturalization of protein present in metal-mechanic industrial water or urban  
water and generate a clarifying and purifying flocculus from said polluted water.
